PARTICIPANTS NEEDED FOR RESEARCH IN

Screening eyes of people in Saskatchewan with non-invasive imaging technologies and artificial intelligence for early detection of neurodegenerative diseases

We are seeking volunteers to participate in an eye study aimed at the early detection of neurological and neurodegenerative diseases, such as Alzheimer's, Parkinson's, and Age-related Macular Degeneration (AMD) as well as for the role of healthy control participants.

As a participant in this study, you would be asked to read and sign consent form allowing the research team to have access to your existing eye images (OCT, and OCT-A).
