Study Title: Understanding Pill Swallowing Difficulties in Healthy Adults and Clinical Populations

RESEARCH STUDY

Are you an adult with Parkinson Disease and currently taking at least one medication by mouth?

Professor Steele and her team are conducting a research study to understand people's experience with swallowing medication including what makes it difficult and how these challenges are managed.

We are looking for participants willing to complete an online survey.

For more information and to access the online survey:

https://redcap.link/SwallowingPills

Takes 10 minutes to complete.
Eligibility requirements apply.
Participation is voluntary.
