

Research study: Dancing with the mind and body

Participants needed
for a study investigating
how brain and body
processes in dance may
help to improve
movement

Who can participate?

- People with Parkinson's OR no neurological conditions
- Normal or corrected vision and hearing
- No significant psychiatric or cognitive disorders

What will I be asked to do?

- Initial video call
- 3 visits to research lab at University of Toronto
- Movement & thinking tasks
- Non-invasive temporary brain stimulation

- Research sessions will be completed individually (not in a group)
- Participants will receive compensation towards travel expenses
